PROJECTS INVOLVED

Personal Portfolio Website

- Role: Frontend Developer
- Technologies Used: HTML, CSS, JavaScript, React

Developed a personal portfolio website to showcase my projects, skills, and contact information.

Federated News Recommendation System

- Role: Frontend and Backend Developer
- Technologies Used: HTML, CSS, JavaScript, React, SQL, TensorFlow.js, Django

The system it created for recommending articles is federated and is dependent on user interactions like clicks, likes, and dislikes. The system uses federated learning approaches to protect user privacy about their data.
